

Q1. Print the third element from a tuple. $t = (10, 20, 30, 40, 50)$

Q2. Print the last three elements of the tuple.

- $t = (5, 10, 15, 20, 25, 30)$

Q3. Join two tuples together.

- $a = (1, 2, 3)$
- $b = (4, 5, 6)$

Q4. Repeat a tuple three times.

- $t = (7, 8)$

Q5. Check if 15 is present in the tuple.

- $t = (5, 10, 15, 20, 25)$

Q6. Find how many elements are in the tuple.

- $t = (1, 2, 3, 4, 5, 6)$

Q7. Find the index of 50 in the tuple. $t = (10, 20, 30, 40, 50)$

Q8. Count how many times 2 appears.

- $t = (2, 4, 2, 6, 2, 8)$

Q9. Swap first and last elements of a tuple.

- $t = (1, 2, 3, 4, 5)$

Q10. Reverse all elements.

- $t = (10, 20, 30, 40)$

Q11. Find the maximum value without converting to a list.

- $t = (15, 6, 89, 34)$

Q12. Find the minimum value without converting to a list.

- $t = (12, 3, 77, 44)$

Q13. Create a tuple with one element

Q14. Assign each element of a tuple to different variables. $t = (100, 200, 300)$

Q15. Get every second element from the tuple.

- $t = (10, 20, 30, 40, 50, 60)$

Q16. Find Maximum and Minimum Element

- Input: (4, 6, 2, 9, 1)

Q17. Replace First Element by 99 creating new tuple.

- $t = (9, 8, 7)$

Q18. Join Two Tuples a & b with a Value x in Between.

- $a = 1,2$
- $b = 4,5$
- $x = 9$

Q19. Find the index of 15.

- $t = (5,10,15,20)$

Q20. Count how many times 2 appears.

- $t = (1, 3, 5, 7)$

Q21. Find index of 11 input = (1,3,5,7,9,11,13,15)

Q22. Access the number 4, $t = ((1,2),(3,4))$

Q23. To a tuple of list add 99. input = (10,20,30,60)

Q24. Access Char "c" from Nested Tuple of Strings

- $t = (["dog","cat"])$

Q25. From (10, 20, 30, 40, 50), get (20, 30, 40).

Q26. Access Last Value 9 from the Nested Tuple ((5,6),(7,8,9))

Q27. Sort elements from the tuple (3,5,8,2,7,1,6,4).

Q28. Reverse a tuple (10,20,60,30,90)

Q29. Extract first 3 numbers from the tuple (1,2,3,4,5,6,7).

Q30. Get the third element from the tuple (10,20,30,60,40,70)

01-01-2025

Q1. Given the list numbers = [10, 20, 30, 40, 50], print

Q2. Given the list of numbers = [1,2,3,4,10,9,8,4], print

Q3. Create a list of numbers and print both the maximum and min() functions?

Q4. Create a list of letters, sort them and print the list

Q5. Create a list of strings and count how many times a string is present in the list using count() method?

Q6. create a list of colours. change the first colour to 'red' and print the list?

Q7. write a code for getting "hello" as output from the following list

- l = [25,30,[26,27,28,"hello"],[32,38]]

Q8 For the above given list replace 27 with 43?

Q9 Insert a value "True" at last second position?

Q10 . Write a Python program to merge two sorted lists into a single sorted list.

Q11 create an empty list and ask user to enter their favourite fruits and store them in a list. Use append() and extend() methods?

Q12. To the above created list. Add three more fruits using insert() method.

01-01-2025

Q26. Reverse a list using slicing?

Q27. Replace the last item in a list with "Pineapple"?

Q28. write a python program to concatenate items of

Q29. write a python code to copy list of fruits using sl

Q30. How do you access the second element of the se

nested = [[1, 2], [3, 4], [5, 6]]?
